

E-VET mucOvital prebiotic

Therapy Feed

Special feed

E-VET mucOvital prebiotic is a special grain-free feed that has been specifically developed for horses with sensitive stomachs. At the same time, it is a fully nourishing concentrated feed that contains a unique combination of plant-based substances, which can help to heal an inflamed gastric mucosa.

E-VET mucOvital can help to neutralise excess stomach acid, and can ensure an optimum acid-base balance as a result of increased saliva production. The prebiotics it contains can gently restore the horse's intestinal flora. Consistent with the evolutionary development of the horse, this feed is made exclusively from natural ingredients that reflect the horse's natural diet. It is high in easily digestible crude fibre and plant oils, and contains a very low amount of sugar and starch.

The benefits at a glance:

- can ease the metabolism
- can bind excess gastric acid, thereby protecting the gastric mucosa
- reduced sugar and starch
- high structure content to encourage chewing
- for supporting general stomach problems
