volaris TERRACEgrain Mix

Wild Bird Feed

Our Eggersmann volaris TERRACEgrain Mix is the shell-free master mix made from selected ingredients tailored to the needs of domestic birds and wild birds. It is particularly suitable for year-round feeding on balconies or terraces, as it does not contain any shells that remain lying around! With the important fat- and energy-rich ingredients and the unique mixture such as crunchy cereal flakes, shelled sunflower seeds and peanuts, you offer the domestic birds an optimal natural recipe that makes the bird's heart beat faster and ensures a very special beak pleasure.

The natural habitats and the associated food supply of our wild birds are constantly changing and becoming increasingly scarce. Help to preserve our diverse bird life by feeding them all year round. The natural cycle of the seasons demands a lot of energy from the birds, if you supplement feed, the wild birds will be grateful for your support and delight you with their cheerful chirping.

The benefits at a glance:

- Wild bird feed rich in fat and therefore rich in energy
- Optimal for free-living birds for year-round feeding
- Shell-free - ideal for balcony & terrace

Fodringsanbefaling:

Our Eggersmann volaris TERRACEgrain Mix is suitable for feeding all year round! If you offer the feed in bird houses or feeders, clean them regularly with hot water. This way you minimise the transmission and spread of pathogens. Make sure that the feed cannot get soaked even in strong winds, snow and rain, otherwise it will spoil or freeze over and the birds will no longer eat it.

Did you know that robins, yellowhammers, dunnocks and blackbirds are so-called ground feeders? They don't like to go to the feeder, but like to pick up the grains from the ground. If you have space in your garden, provide a ground feeder. Simply fill a wooden or plastic bowl with food and place it on the ground.

When you offer food, please also think about water for the birds. Especially in winter, when natural water sources such as puddles or water in gutters are frozen, birds also need an extra bowl of water. However, there is no need for an expensive bird bath at the bird feeder; a flower pot saucer or an old soup plate is perfect as a watering place. The water should be changed regularly.

Sammensætning: Hvede (flager), Havre (flager), Peanuts, Raisins, Sunflower seed, dehulled, Majs (flager), Rapsolie

Analytiske komponenter og indholdsniveauer: 1,60 % Råaske, 2,85 % Råfiber, 12,50 % Råfedt, 12,50 % Råprotein
